## Work experience

<b>2015 to present</b>	<b>Self Employed - <a href="https://aginev.com/">https://aginev.com/</a></b>
Occupation or position held	FULL-STACK WEB DEVELOPER
Main activities and responsibilities	<p>Custom CMR/CRM/ERP development  WordPress theme and plugins development.  Collect requirements, define project goals and respect deadlines.  Organizing the working process.  Proper projects and tasks realization, ensuring the delivery process.  Clients communication.</p>
Type of business or sector	Web Development, SEO, Online Marketing
Projects	<p>Decimo V2 (ongoing) - Much improved version of Decimo project (see below). It could be offered as a multi-tenant application to other accountant offices as well as offering some additional features like VAT refund inquiries.</p> <p><a href="https://boardiful.com">https://boardiful.com</a> (launch coming soon) - The main idea behind the project is to offer a space for interior designers where they can offer their services. It offers a "moodboard" designer tool, where they can arrange a set of products and offer it to the end customer. Laravel/MySQL application at the back-end and Vue and Fabric is used for the "moodboard" designer tool. The project also includes Google Chrome extension tool that gives the designer opportunity to store custom product images at the system with a single click of the mouse. The pre-launch demo video could be found here.</p> <p>Radiology Exams CRM (confidential) - Heroku hosted Laravel and Postgres application. It allows a complete definition of the available radiology exams, groups of exams and proposes a combination of exams that patients could have based on specific criteria. It exposes API endpoints that were used for React and React Native mobile applications.</p> <p><a href="https://decimo.dk/">https://decimo.dk/</a> - Invoice management SASS application made with Laravel 5.7 (Spark) and Angular 6+ that will offer clients management of their invoices and expenses. Integration with third party APIs and payment gateways, email and in App notifications.</p> <p><a href="https://bestil.billigselskab.dk/">https://bestil.billigselskab.dk/</a> - New improved version of the BilligSelskab project made on top of Laravel 5.4 and frontend App built on top of Angular 5. The main goal here was to implement dynamic products that could handle company</p>

registrations as well as other products like Company registration changes, Loan, Changes at owner documents etc. Integration with third party APIs like Penneo and E-conomic. Stripe payment gateway integration.

<https://billigselskab.dk/> – CRM application that handles the company registration process at Denmark

<https://bashmotion.eu/> - Single page website for the one of the most famous music video directors in Bulgaria. Build on top of WordPress.

<https://markacollective.com/> - Corporate and brand identity company website.
