Through the current year he has been also successfully working as web developer on advanced web projects. His performance and attitude was at all times professional and up to the company standards.

The position occupied by him carried the following responsibilities:

- \* Initiate and organize 3D program related to properties complexes;
- \* Organization of the duties in the 3D team;

- \* Entire realization of projects and specific tasks;
- \* Improving quality and deadlines;
- \* Resolution of internal and external issues;
- \* Direct contact with International customers;
- \* Software and hardware support and maintenance;

Due to the reduction of activities, we had to dismiss Atanas. However he is skilled in dealing with the 3D computer graphics and web development applications and is also very precise and focused on the given tasks and their completion within the required deadlines. He is well organized and team player; reliable, with professional communication skills and manners; able to define priority, give fresh ideas and options for the decision making process; respecting the company rules, working hours;

I am happy to recommend him to every company or provide further information if required.

Yours faithfully,

Nicolas Galand
