

To whom it may concern,

I am writing this letter to recommend Atanas Ginev as a PHP Laravel Software Engineer. I have worked with Atanas on a complex web based application for a Canadian Health Care company. His skills and knowledge were unparalleled. He has the right sense for urgency and always delivered his work timely and with good quality.

Atanas was tasked with building the entire PHP Laravel back-end, including Content Management System, API and User Authentication, and he did an excellent job.

A reliable and highly capable engineer, I can't recommend him highly enough.

Please contact me if you need further information about him. I would be glad to help you and Atans as much as I can.
